Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

THE NEW ERA PRINTING COMPANY

LANCASTER, PA.

Is prepared to execute in first-class and satisfactory manner all kinds of printing and electrotyping. Particular attention given to the work of Schools, Colleges Universities, and Public Institutions.

Books, Periodicals

Technical and Scientific Publications

Monographs, Theses, Catalogues

Announcements, Reports, etc.

All Kinds of Commercial Work

(*Printers of the Bulletin and Transactions of the American Mathematical Society, etc., etc.*)

Publishers will find our product ranking with the best in workmanship and material, at satisfactory prices. Our imprint may be found on a number of high-class Technical and Scientific Books and Periodicals. Correspondence solicited. Estimates furnished.

WILEY BOOKS

NOW READY

The New Eighth Edition, Revised

The Elements of
Theoretical and Descriptive Astronomy

For the Use of Colleges and Academies

By the late CHARLES J. WHITE, A.M.,
Formerly Professor of Mathematics, Harvard University

Eighth Edition, Revised
By PAUL P. BLACKBURN
Commander, U. S. Navy.

Commander Blackburn's revision of the late Professor White's famous text-book brings the treatment of the subject up to date without making material changes in its form. The main facts and principles of astronomy are presented in a manner adapted to the elementary course of instruction commonly given at colleges and in the higher grades of academies.

For many years the U. S. Naval Academy has used this book as a text.

309 pages, 5¼ by 8—84 figures and 9 full-page half-tones. Cloth, $3.00 postpaid.

The Dynamics of the Airplane

(No. 21 of Mathematical Monographs, Edited by Mansfield Merriman and Robert S. Woodward)

By KENNETH P. WILLIAMS, Ph.D.,
Associate Professor Mathematics, Indiana University.

An introduction to the dynamical problems connected with the motion of an airplane, for the student of mathematics or physics. While not written for the person interested mainly with design and construction, most of the questions treated have some interest for anyone who is familiar with the entire field of aeronautics.

138 pages, 6 by 9—50 figures, Cloth, $2.50 postpaid.
